Dear Sirs

In 2009 Informatix Inc, Japan (IFX) granted to Informatix Software International Limited (ISI) certain licenses and agreed certain commercial terms to enable ISI to develop, maintain and sell IFX's MicroGDS and Piranesi products outside of Japan. After ISI's failure to comply with certain of its obligations under the agreement over a matter of months and serious concerns about ISI's financial status and ability to pay its creditors, IFX decided that it had no alternative but to terminate the licences and agreement with effect from 11th October 2010, with the result that from that date ISI has had no capability to use any of IFX's Intellectual Property (copyright, trademarks and domain names) in respect of those products.

IFX are presently considering the best way for the loyal user base of MicroGDS and Piranesi to be supported and will be issuing a statement on this in due course. In the meantime and for the avoidance of doubt, neither ISI nor anyone on its behalf has the authority of IFX to develop, maintain or support the MicroGDS and Piranesi products and any statement by anyone to the contrary is not authorised by IFX.

If you have any questions or support issues please contact us at:

microgds@live.co.uk for MicroGDS issues.

piranesi@live.co.uk for Piranesi issues.

Yours faithfully

Masanori Nagashima
Chairman
Informatix Inc.
